

How to buy a home in De Krijgsman Muiden

Thank you for your interest in a property in Muiden's De Krijgsman neighbourhood. This unique project of 1,300 houses and apartments is being developed by KNSF Vastgoed.

The new homes being built in De Krijgsman can be bought freehold by signing a purchase agreement with the landowner and a building contract with the contractor for construction of the home.

We have selected several suitable contractors to build the properties. All of the contractors involved in this project work in accordance with the Woningborg/SWK construction warranty, which guarantees the quality of the home, the contract method and the final delivery. This gives you maximum security as a buyer.

The assignment of the land will be carried out by CMS, an international notary firm with several offices in the United Kingdom. CMS can oversee the entire land assignment process from its branch in London.

For more information we request you to contact our international information desk, headed by Mulyani Dambrink, to make an appointment. She can be reached on
